

About The Development Of This System.

This Paint Store Management system is developed by: Tsedup Dorjee Lama, Nabaraj Khadka and Biplab Dhungana Students Of Islington college as a groupwork, Given to us as an Assignment of the Module Emerging Programming Platforms and technologies for the first semester of year 2.

The main Aim of this software is to help costumers search for the paints that they require according to their budget and also to help the staffs of the paint shop to add different paints to the menu in a convenient way.
